

CYBER SECURE

WE UNDERSTAND CYBER RISK

Whilst data losses for SMEs may not make the headlines, the potential financial cost and reputational impact of a cyber incident can be crippling. As all businesses could be at risk from a cyber attack or data breach by hackers, viruses or errant employees, having specific insurance coverage in place to mitigate a cyber event can reduce its impact on a business from a financial, reputational and business interruption perspective.

TARGET MARKETS

Small and medium-sized organisations that utilise electronic systems

KEY FEATURES

- A rated capacity
- Limits up to £500k
- Cyber crime extension available
- Premiums from £230 + IPT + £35 fee
